

European Society for the Peri-operative Care of the Obese Patient

ESPCOP Winter Scientific Meeting 2024

*Current challenges in Obesity Anaesthesia
- a synthesis of evidence and clinical experience*

Thursday 23rd of January 2025

19.30 to 21:05 CET (Central European time)

A live on-line meeting with delegate participation and interaction
Five short talks with time for Q&A, followed by a blitz pro-con.

Program:

19:30 - Opening, Welcome and Introductions

19:35 - What have we learned about obesity from the UK NAP studies?

- *Prof Tim Cook, UK*

19:55 - Ventilation and Lung Recruitment in patients with obesity: Where are we currently?

- *Prof Lorenzo Ball, Italy*

20:15 - Key Points in best care of the obese parturient

- *Prof Ayten Saracoglou, Qatar*

20:35- Practical TIVA – Using the Eleveld Model safely in Severe Obesity

- *Hugo Vereecke, Belgium*

20:50 -Today's patient for elective surgery is on a GLP-1 receptor agonist: stop or continue?

Five minutes to convince!

- Pro - we must cancel their operation- *Associate Prof Daniela Godoroja, Romania*
- Con - Stopping GLP1 agonists before elective surgery is wrong: the benefits of continuation outweigh the risks – *Dr. Sarah Saxena, Belgium*

21:05 Summing up and meeting close

Outside Europe? The session will be recorded and transmission repeated eight hours later..
